VISION
WORLD CLASS ADVENTURE LEARNING

MISSION
CATALYST FOR GROWTH, DEVELOPMENT AND CHANGE

CORE VALUES
Fun Open Challenge Understand Safety

FOCUS ADVENTURE
3 levels of experiential learning programmes, each tailored to specific needs and requirements

RECREATIONAL
Enjoy outdoor fun-filled activities such as Kayaking, Archery, Sailing, Staff-Family Bonding Day and many Others.

EDUCATIONAL
3 key building blocks of any organisation development efforts;
Team Development (The Teambuilding Challenge!)
Leadership Development (The Leadership Challenge!)
Change Management (The Innovation Challenge!)

DEVELOPMENTAL
Address real time organisation challenges such as conflict resolution and change management.

THE EXPERIENCE
Execute Your Corporate Learning Programme The Unconventional Way!
At FOCUS Adventure, we are perennially on the lookout for engaging, energising and captivating experiences for our clients. The best proof of quality is through the experience and words of our existing clients, who keep coming back for more! Nothing builds a team like “shared experiences”, challenging physical and mental barriers, while having fun at the same time.

“Having established ourselves in the Adventure Learning industry, FOCUS Adventure is now a registered Social Enterprise. We aim to work closely with our Corporate Clients to incorporate various Corporate Social Responsibility (CSR) elements into our Adventure Learning programmes to make a difference.”

OUR UNIQUE SELLING PROPOSITION (CLBMM)

- Customisation
- Learncentric
- Business Leaders
- Multi-cultural Environment
- Multi-sensory Experience

METHODOLOGY (FAPAE)

FOCUS on Objectives
The entire learning programme is tailored to our clients' specific business objectives and operation needs.

Application-Centred
Learning is transferred by translating the experience to actual work practices.

Paradigm Shift
We aim to bring about radical changes and a shift in personal and organisational belief systems and culture.

Adventure-Based Experiential Learning
Adults learn best when it is problem-centred and action-oriented. This is the basis of adventure-based experiential learning. As such our activities ensure full participation and lessons are drawn from the experience.

Evaluation
Evaluation up to Level 3 based on Kirkpatrick's Model can be conducted to measure the effectiveness of the programme.
“Team bonding brings people together by encouraging collaboration and teamwork. Fun activities that help people see each other in a different light allow them to connect in a different setting. After completing team building activities together, participants (including me) better understand each other's strengths, weaknesses, and interests. This understanding helps us work even better together on future progress vital to each of everyone company.”
Alijandro Chua Prado, KFC Restaurants Asia Pte Ltd, December 2018

“Team work is always good. Helping each other in tough situation brings you closer to your colleague, know them better and we don't meet or see every colleague everyday as people represent different countries/regions”
Sameer Bhatia, Inddia & SAARC, Seagate Singapore International Headquarters, November 2018

“Enjoyed the activities, Blindfold Shapes and Building Blocks. Both highlighted the importance middle management having a clear goal and the occasional disconnect between higher command and the grunts the need to speak the same language, in silos, we develop our individual lingo which makes it harder for us to work with other divisions in the same organisation”
Abhiram, MOH Holdings Pte Ltd, October 2018

“Facilitator reinforced the key messages effectively, using humour, throughout the entire team building. Facilitators were perceptive to identify behaviour and used such behaviour to illustrate team dynamics.”
Tan Choon Shian, Workforce Singapore, September 2018

“Something out of the ordinary from other training modules provided, transport over and food are provided, interesting to experience the course (rock climbing and belay) and able to attain some form of cert. Very good.”
Hooi Ying Yi, Oversea-Chinese Banking, August 2018

“We really enjoyed the event and you guys were very easy to work with. Being prompt with emails myself, I was and continue to be very impressed with your promptness as well. 5 Stars. I wouldn’t suggest any changes as I think the event went very well. Not too long, not too short. Maybe could extend by 15 minutes here or there, but we made it work just fine.”
Becky, Nestle, July 2018
“I participated in the 2D1N FOCUS Adventure camp held at Sentosa island as part of the Ministry of Transport (MOT) family orientation week. The efforts and facilitation provided by the various instructors allocated to our course today were extremely exceptional and praiseworthy. The entire team showed great chemistry to put up a very good conduct for the student scholars from MOT. In particular, Instructor Nizam inspired great confidence in us as we took part in the Team Challenge Hourglass challenge. All participants took the 24m leap from the tower and I believe this speaks volumes of the abilities in Instructor Nizam who was able to give us very clear instructions and encourage us to do our very best in conquering our fears. Head instructor Bryan was also exceptional in the way he handled the various debrief facilitations on 27th June. Instructor Bryan was very nuanced in the way he sought to bring across his powerful insights, especially during his final debrief. In addition, he was very confident in conducting our course, imparting concise instructions and helping the team meet our eventual goals.

As a student, I have had the privilege of attending several leadership/adventure camps, but the instructors at FOCUS Adventure today have gone far beyond their duties to ensure that all the participants today left feeling fortunate to have undergone this short course.

I hope that the management team may be able to view this message and credit the entire team who were in charge of conducting the MOT 2D1N camp. Thank you very much!”
Rahul Jayaprabha, MOT, June 2018

“Kindness, warmth and humour shown by the Facilitators really made this corporate event in a non-corporate setting stand out. A refreshing breather and breath of fresh air away from our cubicles and customers. The consistent emphasis on linking/leveraging learning lessons to apply back to work was also much appreciated :)”
Yu Kai Yao Rich, HDB, May 2018

“My team and I had an splendid time with your company despite the rain, each of us have enjoyed ourselves. Please convey my sincere thanks to your whole team that coordinated and facilitated our team.

Thank-you for accommodating to our needs and doing accordingly. We are glad to choose the right company and will engage you guys in our future teambuilding events.”
Priya, PrIME Biologics, April 2018

“We had a great time participating in the teambuilding activities organised by FOCUS on 10 March 2018. Please send my heartfelt thanks to your team of facilitators for the coordination and hard work they put in to make this yet another memorable experience for our colleagues. I’m sure each of us has brought back some key learning objectives as takeaway as well as good memory with the rest at the end of the programme. Shall look forward to engaging FOCUS again in the future. Thanks a lot!”
Kate Yeo, SONY, March 2018

“First of all, I would like to congratulate your TEAM for the good job done! All our participants are so impressed with the way your Facilitators managing the activities. It was very clear, interactive and very motivated too. We will definitely will want to use FOCUS for our next workshop!”
Brenda Yap, ROCKWOOL Malaysia Sdn Bhd, February 2018

“There is a lot of hand ons activities with good interactions with fellow colleagues and Facilitators. Impressive amenities with sufficient toilets cubicles with shower heads (>10) despite in Sentosa outdoor areas. The Facilitators have shown very good enthusiasm in their work. Well done. Keep it up.”
Philip Chop, SGS International, January 2018
FOCUS Adventure’s Challenge Technology and Skills (FACTS)

The effectiveness of training programmes largely depends on the quality of the trainers and facilitators. Thus, it is important for trainers and facilitators to upgrade their skill sets and knowledge. FACTS is a 3-day Train-the-Trainer Course for participants to learn more about FOCUS Adventure's methods, techniques and processes in facilitating Adventure Learning Programmes. Through this course, participants will learn how to design, customise and conduct Adventure Learning Programmes as well as ways to integrate Adventure Learning techniques into other forms of learning methods, such as classroom based training or coaching. This course is ideal for trainers and facilitators who are looking for new ideas and techniques to increase participants engagement.

**LEARNING OUTCOMES**
- Learn about FOCUS Adventure’s techniques and approaches
- Learn how to design and conduct effective Adventure Learning Programmes
- Learn how to customise activities to meet different learning objectives
- Learn how to apply Adventure Learning concepts into other forms of learning methods

**COURSE IS FOR**
- Trainers, Educators, Coaches, Instructors and Facilitators
- HRM, HRD and L&D personnel interested to learn more about Adventure Learning
- Anyone in the people development sector

**COURSE DELIVERY FORMAT**
- Indoors and outdoors activities
- Group discussion and activities
- Practice and feedback

**COURSE FEE**
- $1500 + GST (may be subject to changes)
- Inclusive of 3 meals per day
- 10% Early Bird Discount (payment received 4 week before course commencement)
- Group Discount of 5% for two or more individuals from the same organisation
FOCUS Consulting specialises in process facilitation. At the heart of FOCUS Consulting we believe that the solutions lie in people. Facilitation enables organisations to harness valuable ideas and insights from within. We adopt a facilitative consulting approach towards organisational development because facilitation:

- Breaks Down Tradition Organisation Boundaries
- Promotes Team Learning
- Builds Consensus and Strengthens Commitment

**THE FOCUS CONSULTING MODEL**

The FOCUS Consulting Model is a framework that helps teams and organisations develop sustainable solutions. Represented by the word FOCUS, the 5 elements in this framework are applied progressively, building on each other as the group advances through the facilitated session.

- **FUTURE**
  - Vision Objectives
  - Provides the direction for growth and success. A clear vision allows members to align their personal aspirations with the team’s vision.

- **OPPORTUNITIES**
  - Openings Resources
  - Enabling factors. It involves identifying resources and creating openings to facilitate the change process.

- **CHANGES**
  - Improve Innovate
  - Are required for improvement. When things are done the same way, they will produce the same results. To progress, what does the team need to change?

- **UNIQUE PROPOSITIONS**
  - Distinctive Different
  - The differentiating factors in each idea. Unique propositions are used to identify the best ideas.

- **SYSTEMS**
  - Infrastructure Support
  - Support network for ideas to grow and flourish. It is about the development of infrastructure for the ideas to be self-sustaining.

**FACILITATION SERVICES**

FOCUS Consulting is able to help your organisation and team with:

- **Strategic Planning**
  To develop new and innovative plans and the infrastructure to support its implementation.

- **Vision/Mission Creation or Recreation**
  Setting new directions or repositioning the organisation’s purpose and objectives.

- **Gap Analysis and Action Planning**
  For the group to compare the future state and current state, and identify actions that need to be taken to bridge the gaps.

- **Brainstorming**
  Generate new ideas and initiatives for growth purposes or solutions to address issues.

- **Consensus Building**
  Enable individuals or departments with opposing views to negotiate objectively, by focusing on common and long-term benefits and come to an agreement on specific issues.

- **Conflict Resolution**
  Allow members to express their genuine feelings and concerns in a safe environment. Only when the real issues are addressed would everyone arrive at sustainable solutions.

- **Process Improvement**
  Find ways to improve operations efficiency at functional and organisation-wide levels.

- **Management Feedback Session**
  An avenue for management to receive open and honest feedback from their team. This is a team-member only session to encourage spontaneity.

- **Leaders/Team Engagement Session**
  A platform for leaders and team members to engage in an open and meaningful dialogues. An opportunity for members to share their views and to be heard by management.

- **Focus Group Discussion**
  To gain information by gathering a group of individuals for discussion on a specific issues or topics. Invites are usually subject matter experts or feel passionate about the issues.
FOCUS Adventure’s The Leadership Challenge! is a three-day developmental programme for leaders, managers and supervisors of all levels, as well as for employees that are preparing for leadership responsibilities. This programme engages participants in an intensive learning experience that is designed for adult learning styles, using a mix of these following approaches:

- 360 feedback on leadership practices (pre-work)
- Presentation on key leadership concepts
- Sharing of best leadership practices from peers
- Experiential activities
- Self reflection and team discussion
- Center on actual application

FOCUS Adventure’s The Leadership Challenge! programme consists of two segments - a two-day programme, followed by a one-day follow up session three months later.

**Two-Day Programme**

- Centers around 360 feedback results
- Provides in-depth knowledge on the Five Leadership Practices
- Involves Peer sharing of best leadership practices
- Focus on applied learning

**One Day Programme**

- ‘Pit-stop’
- Provides a second round of feedback from same respondents
- Measures progress
- Reflects on achievements made
- Builds confidence to inspire more people

FOCUS Adventure’s The Leadership Challenge! Journey

Option to customise the duration of this programme is also available.

The Leadership Challenge is a registered trademark of John Wiley & Sons, Inc. The associated icons are copyright © 2011 John Wiley & Sons, Inc. www.leaderechipallenge.com
**DISC (DOMINANCE, INFLUENCE, STEADINESS, CONSCIENTIOUSNESS)**

DISC Profiling is a classic personality profiling tool based on the work of William Moulton Marston. DISC provides a non-judgmental language for exploring behavioural issues across four primary dimensions: Dominance, Influence, Steadiness, Conscientiousness. By better understanding oneself, participants can build a more cohesive team.

**MBTI (MYERS-BRIGGS TYPE INDICATOR)**

One of the most widely used personality instruments in the world, the Myers-Briggs Type Indicator was originally created for the purpose of helping people make better career matches and appreciate differences. Today, we apply the MBTI to the workplace so participants can gain self-awareness of their working behaviour, drawing out their potential and improving relationships.

**SDI (STRENGTH DEPLOYMENT INVENTORY)**

The SDI specifically considers what motivates us when things are going well, and when things are not ideal. It gears towards the motivations and values that underpin our behaviours. Understanding the motivations behind behaviours can lead to greater personal awareness for the client. The SDI is proven to dramatically increase the effectiveness of employee development and manager training programmes.

**TDI (TEAM DEVELOPMENT INVENTORY)**

Of all the challenges faced by large corporations today, teambuilding ranks as one of the biggest and the most critical. Using a range of tools and techniques, the Team Development Inventory assesses a team’s needs and generates true commitment to teambuilding from participants in a short period of time. This results in measurable improvements in a team’s subsequent performance.

**LPI (LEADERSHIP PRACTICES INVENTORY)**

Developed by Jim Kouzes and Barry Posner, this celebrated instrument package approaches leadership as a measurable, learnable, and teachable set of behaviours. This 360-degree leadership assessment tool helps individuals and organisations measure their leadership competencies, while guiding them through the process of applying Kouzes and Posner’s acclaimed Five Practices of Exemplary Leadership Model to real-life organisational challenges. At FOCUS Adventure, we apply the LPI to experiential Adventure Learning activities to maximise learning outcomes for participants.

**Emergenetics**

Emergenetics is a brain-based psychometric instrument that highlights thinking and behaviour, describing people using four thinking attributes and three behavioural attributes: Analytical, Structural, Social and Conceptual; Expressiveness, Assertiveness and Flexible. An Emergenetics profile illustrates the way you mix and match the seven attributes to interact with others, and gives you insights into how you think and behave, how you learn, how others see you and how you react to others. And within a team, it will allow your understanding of how you prefer to contribute, how you would communicate your ideas and which conditions you would work best in.
It's a **VUCA** world! **VUCA** (Volatile, Uncertain, Complex, and Ambiguous) describes the fast-changing and often chaotic environment organisations face today. To navigate the **VUCA** environment effectively, organisations need to equip themselves with new insights and adaptive leadership abilities.

The **VUCA Challenge** is designed to simulate the four elements of **VUCA** in a controlled environment. Working in teams, participants will work on complex activities that have no clear solutions visible. To succeed, they have to rely on the collective wisdom of all members and come up with rapid responses to cope with the changing environment.

By forcing participants out of their comfort zones, personal attributes that are usually difficult to observe back in the office are surfaced. Responses and reactions in the volatile, uncertain, complex and ambiguous (**VUCA**) situations can then be assessed.

**Learning Objectives includes:**

- Understand the impact of **VUCA** in today's dynamic environment
- Identify key principles to lead people, teams and the organisation through **VUCA**
- Learn the strategies to ride the **VUCA** waves

---

**Speed and dynamics of change.**

**Volutility**

**Ambiguity**
Multiple Interpretation and answers.

**Uncertainty**
Lack of certain information.

**Complexity**
Relationship between many different components.
The Values-in-Action Challenge!

Organisations are defined by their core values, and values guide action and behaviours. One of the best ways to experience, learn and/or reflect on organisation core values is through Adventure Learning.

The experiential nature of Adventure Learning activities brings the values to life, allowing participants to apply and demonstrate the values in a safe environment. Post activity debriefs highlighting on the benefits of the values will further reinforce the importance of corporate values. Participants will be engaged in group discussion to gain a deeper understanding of the values, including learning from others’ personal experiences.

Research has shown that strong alignment between personal and organisation values contributes toward high performance. Beside team based activities, participants will also reflect on their personal values and how they can be better orientated towards the organisation values.

Learning Objectives includes:
- Reinforce understanding of organisation core values
- Experience core values in a fun and experiential manner
- Learn the different ways of applying core values through team sharing and learning
- Aligning personal values to the organisation’s values

HIPO Assessment Programme

High Potential (HIPO) development programmes are implemented by many organisations to identify and develop talented employees, to prepare them for key leadership positions within the company. One of the most effective approaches to assessing potential is through Adventure Learning. By forcing participants out of their comfort zone, this surfaces personal attributes that are usually difficult to observe back in office, such as their response to volatile, uncertain, complex and ambiguous (VUCA) situations.

Programme Objectives include:
- Provide different opportunities for HIPO candidates to demonstrate their leadership potential
- Gain a deeper understanding of HIPO candidates through assessment in different environments
- Create learning opportunities for HIPO candidates through self-reflection and feedback
**Core Activities**

**Mobile Adventure Programmes**

- Helium Hula
- Warp Speed
- Blindfold Shape
- Inter-Link
- Key Punch
- Building Blocks
- Mouse Trap
- Turning Point
- Minefield
- Alpha Link
- Construction Maze
- Tower of Hanoi
- Handover
- Mission Impossible

Where every moment is a challenge!
HELIUM HULA
Our mindset determines how we perform and the flexibility of our mindset determines how much we can achieve. Shifts in paradigm are essential to a team's performance in this activity.

WARP SPEED
In the modern day of systems, processes lay the foundation for consistency. Warp Speed challenges the team's paradigm to reinvent the status quo.

BLINDFOLD SHAPES
‘No one plans to fail but many fail to plan.’ Success in this activity depends on the team's ability to develop a plan - one with a clear goal and well defined roles.

INTER-LINK
No man is an island. Discover what it means to be ‘inter-linked’. A powerful team activity that forces teams to stay mentally and physically engaged.

KEY PUNCH
‘The only constant is change.’ Key Punch put teams in an environment of change, where each member's reaction and response will ultimately determine the team’s performance.
BUILDING BLOCKS
Communication is vital in any high performing team. This impactful team activity challenges the way teams pass information within and between levels.

MOUSE TRAPS
Mouse Traps challenge perceived fears and enforces trust in the people and the system.

TURNING POINT
A simple yet impactful team activity that keeps teams thinking. Discover the ‘Turning Point’ of teamwork and breakthrough results.

MINEFIELD
Very often individuals do not have a clear view of the environment they are navigating in, but with support and feedback from their team members around, they can form a clearer picture and succeed in meeting their objectives.

ALPHA-LINK
Leave no one behind. Alpha Link challenges a team’s ability to focus on their task at hand without neglecting individual team members.
CONSTRUCTION MAZE
Envisioning a common future is a hallmark of a high performing team. Construction Maze challenges the team's ability to envision a common goal.

TOWER OF HANOI
Discover the importance of systems thinking, seeing the importance of entire work processes instead of individual parts. Success depends on how well the team can plan and execute an effective process.

HANOVER
The success of a team hinges on accountability, responsibility, and consideration, not just towards their objectives, but more importantly towards each other.

MISSION IMPOSSIBLE
In today's world, very rarely do teams have an abundance of resources to work with. Teams need to problem solve with what little they have to achieve their objectives.
Challenge your fears and limits! Standing at 24m tall, this majestic tower brings out the best in the team. Witness individuals step up as leaders to guide and motivate others. Hand in hand, teams will have to work together to overcome their perceived limitations to reach the summit.

Teams will work together to overcome various challenges as they ascend towards the Pyramid's peak. Celebrate the conquest and ring the bell in triumph before descending the tower with a heart thumping Flying Fox.
FOCUS Adventure has gone the extra mile to bring you the increasingly popular sport of Geocaching, integrating it with innovative corporate Adventure Learning activities to fuel team spirit and achieve corporate excellence.

With the use of handheld Global Positioning System (GPS) devices and objective-based team activities, The Geocaching Challenge provides a fun and engaging experience that could bring out values of Innovation and Dynamism.

No matter the location or country, we will provide a diverse range of route points that would satisfy every adventure seeker, history buff and nature lover alike.

**SO WHAT IS GEOCACHING?**

**Geocaching is an outdoor treasure-hunt activity in which the participants use a Global Positioning System (GPS) receiver to seek items called “geocaches.”**

---

**The Incredible Race!** brings the Thrill and Excitement of Adventure Learning **Around the World!**

This challenge can be conducted anywhere in the world, incorporating team challenges and photo quizzes that depict the unique local culture to maximise the impact of Learncentives trips.

Beijing, Shanghai, Hanoi, Bali, Bintan, Phuket, Chiang Mai, Bangkok, Melaka and more. No matter the location or country, we will customise the challenges to fulfil your learning objectives.

Exploration and teambuilding combined into one effective yet fun activity. Come experience **The Incredible Race!**
Experience **The Heritage Challenge**! with FOCUS Adventure and re-live the good old days together with your team mates whilst immersed in a fun-filled Experiential Learning Journey through the history-rich streets and landmarks of Singapore.

**Highlights include:**
- Heartland Heritage
- Historical Site, Buildings and Monuments
- Food Heritage
- Cultural Heritage

Join us on this spectacular race starting from Singapore’s only hilltop destination connecting to the State Of Fun, Sentosa. Located 100m above sea level, Faber Peak offers dining, entertainment and meeting rooms. The Cable Car Sky Network links Faber Peak to the Merlion and the sandy beaches of Sentosa. This connectivity allows you to travel around the race areas not just on foot, but also on Sentosa’s free tram services and of course, the Singapore Cable Car.

Let’s enjoy the sun, sand and the priceless views from the cable car while building your team’s communication, cooperation and cohesiveness.
Our Activities

The Botanic Gardens Race

Want a get away from the concrete jungle and be surrounded by the beautiful greenery in sunny Singapore? The Botanic Gardens Race is the challenge for you!

Seek answers, attempt challenge stations and take photos with your teammates in this beautiful location with over 150 years of history and over 10,000 species of flora and fauna. This place is a star attraction for both overseas visitors and local residents.

Come join us on this race held in the only tropical garden to be honoured as a UNESCO World Heritage Site, our very own Singapore Botanic Gardens.

The Pulau Ubin Race

Away from the hustle and bustle of Singapore city, Pulau Ubin is often considered as the last Kampung in Singapore. Travel back in time to the 1960s, before the first HDB was built, when days were slower and life was simpler. Take this opportunity to explore with your teams, seeking answers while enjoying a taste of nature and the rustic village life. Complete different challenges to score bonus points and snap photos throughout your journey in this wondrous island of nature.
The Incredible Singapore Zoo Race is a popular Adventure Learning programme catered specially for the Singapore Zoo.

With more than 2,800 animals representing over 300 species of mammals, birds and reptiles, the Singapore Zoo provides an eye-opener experience for all participants.

The Bird Park Adventure! is a full day programme consisting of a race around Jurong Bird Park and The Angry Bird Trebuchet Challenge! Home to over 5,000 birds with 380 species, this programme is designed to take participants through the sounds and sights of the Jurong Bird Park. Participants get the chance to marvel at the different species of the birds and their special abilities. For the lucky ones, they might even have the opportunity to interact with them up-close and personal!

As the fun does not end there! Participants will receive materials to build their own mighty trebuchet and a clay figurine based on The Bird Park Adventure! Teams will challenge each other to battle, only the best will triumph!
Immerse yourself in a day of Adventure Learning with your team where we bring you through the world’s most iconic rivers! The River Safari Challenge! brings you through the latest attraction by Wildlife Reserves Singapore, featuring a large array of freshwater fauna and over 6,000 animals, including the famous giant pandas, Kai Kai and Jia Jia!

The River Safari Challenge! is an outdoor programme which requires the teams to acquire as many points as possible while the clock is ticking. Teams will have to search for the designated locations around River Safari and complete various tasks or challenges along the way. Will your team have the winning qualities to emerge as the champion?

The River Safari Challenge! can also be extended to a full-day programme, by incorporating The Aqueduct Challenge! With global warming greatly affecting Planet Earth, many areas around the world now face severe water shortage. In the second half of the day, teams will be tasked to draw inspirations from the iconic rivers, to recreate a man-made River also known as Aqueduct, to redistribute water to the water-scarce areas on Planet Earth. Within their teams, participants have to work against time, manage their limited resources and construct a working Aqueduct prototype within strict requirements. Ultimately, the prototype will be put to test by our “Water Distribution Expert”. Will your team’s Aqueduct meet the mark?
The path across the rough sea is a fine metaphor for a team’s journey towards peak performance. Always unpredictable and ever-changing, the team will never know when the current will be on their side. Teams have to strategise and work together to decide how to make the best use of their limited resources.

Challenge the team’s will and commitment as they paddle across unchartered waters on their SELF-MADE raft to the finish line. The Rafting Challenge! begins as teams craft out their design and extends all the way to the glorious and victorious end.

*Bring your team together and ‘raft’ it out at sea!

Set sail to new shores in your very own self-designed and self-constructed boat in The Build-a-Boat Challenge! Making use of everyday materials such as plastic bottles, you will be surprised by how one’s creativity and resourcefulness can permit a person to cross the waters.

Teams will have to come together and start from scratch, designing the boat which teams will construct. The actual building phase will see your design come to life. Oftentimes, adjustments have to be made due to new developments or limited resources to be able to deliver a boat within the given time.

In the final stage, the bravest team members will set off for a race against the other teams, proving their boats’ worth. The moment of truth comes when teams get to see if their boats stand the test of the elements.

Excitement, fun and action is guaranteed in The Build-a-Boat Challenge!
The Dragon Boat Challenge is a programme designed for people from all walks of life! Using a 10-men boat, teams get to paddle as one to achieve or unlock certain challenges in the water in order to emerge as the champion! The true definition of teambuilding comes to live as people plunge their paddles into the water to pull their boats forward. Teams may create a mascot of their desired Dragon Head that will be attached to the Bow of the boat. Bring out the dragon in your team!

Make Sailing more extraordinary with a teambuilding element in it! With two beautiful 42 foot ketch sail yachts, teams not only enjoy the thrill of sailing, but also race together!

Teambuilding comes in as EVERYONE in the team will have to either pull the ropes in, move the sails or trim the lines – all having a different role but same objective which is to turn the boat the soonest without reducing too much speed.

So don your sailor’s cap and come down for an experience your team will never forget.
FOCUS Adventure firmly believes in giving back to the society and we have been actively supporting youths and elderly from various Voluntary Welfare Organisations. By conducting pro-bono programmes for our beneficiaries, we hope to engage and connect with them through our Adventure Learning methodology. At the same time, we identify participants who display Leadership and a positive attitude, and offer them employment opportunities through our internship programme and scholarships to develop and hone their skills.

Experience building a functional bicycle from scratch!

The Build-a-Bike Challenge is a fun and challenging team-building activity infused with a CSR element, as the bicycles will be donated to group of children from a beneficiary. Hence, making it a meaningful and memorable experience gained as a team.

If you are looking for an exciting challenge with a meaningful element, The Supermarket Race Challenge is the programme for you! Teams will earn their budget by attempting a series of challenges. Given a limited time and facing multiple challenges, teams will have to plan and make strategic decisions to optimise their resources, and purchase as many of the list of desired items as possible for a good cause.
Our Activities

The Supercar Challenge! is an exciting activity where teams compete to build and design the best supercar on the racing track! With limited time and resources, teams will have to put the exterior parts of the supercar together, and decorate it to become not only the best, but the most ash-covered car on the race track as well. While teams are cracking their brains to build the supercar, they will have to design and create a race track that will allow the supercars to show their best capabilities.

The Gracious Giving Challenge! in this programme, participants will have to bid for individual objects consisting of common household and food items. With the items they have bid for, teams have to wrap it up into a beautiful hamper which will then be given away to the less fortunate members of our community. Teams can also prepare a short massage for the beneficiaries to add a personal touch to the hamper.

The LEGO Challenge brings you back to the childhood of playing with LEGO bricks, designing and building something from scratch. It is easy for an individual to start stacking LEGO bricks, but the challenge comes when a team of individuals come together to brainstorm and merge different ideas into a collective LEGO masterpiece. In the planning stage, teams are required to channel their inner creativity, and think out of the box to make sure all the LEGO bricks come together to achieve a desired outcome. This can only be achieved when teams communicate with each other and make decisions to move the team forward.

After the teams have completed their LEGO masterpiece, all the LEGO bricks will be given a second life and donated to children from a beneficiary. The LEGO bricks will help to unleash the children’s creativity, the same way it helped the teams during The LEGO Challenge!
REAL-TIME STRATEGY FOR THE TEAM

Research shows that hands-on, minds-on learning produces a deeper, more meaningful and understanding of the world and its possibilities - more so than listening or reading. When working with LEGO SERIOUS PLAY, you will use 3-dimensional thinking by creating and constructing metaphors to describe real situations your organisation faces. When our hands are used in learning, a complicated process takes place that generates a powerful emotional changing. As a result, thoughts and ideas that are built with our hands tend to be expressed in greater detail and are more easily understood and remembered.

THE LEGO ROBOTICS CHALLENGE

Do robots and technology intrigue you?

The LEGO® Robotics Challenge takes LEGO to a whole new level – based on real time strategy games using LEGO® Mindstorms robotics kits. Teams need to pit their strategies, teamwork and LEGO® robots against each other.

This is designed for companies dedicated to enriching their workplace, which leads to greater productivity, collaboration, creativity and innovation.
Our Activities

The RollerCoaster Challenge!

Teams will have to design and build a fully operational roller coaster. There are no fixed manuals or custom-built kits to stifle one's creativity. The provided materials are plain, everyday raw items so the team would be impelled to create! Only with precision engineering will the carriage successfully and safely travel through the entire system.

In The RollerCoaster Challenge, participants will be encouraged to think differently and unleash their creative juices.

AN EXHILARATING CORPORATE LEARNING EXPERIENCE

THE ANGRY BIRD TREBUCHET CHALLENGE!

FOCUS Adventure revives this long forgotten medieval weapon to bring forth an exciting team based activity that is refreshing, fun, intellectually stimulating and most importantly a huge learning opportunity!

Teams are challenged to design and build this medieval weapon to protect their “castles” from enemy invasion. As a part of the process, members must also decide on the projectile mass, the launch angle and the counter-weight mass to launch the perfect attack! A successful launch of the “Angry Bird” demands that roles are well assigned based on individual capabilities, trust among fellow troopers, adjusting to changing scenarios and communicate effectively strategies to reach a common team vision and mission.

Achieve victory as a team and triumph in The Angry Bird Trebuchet Challenge!

Where every moment is a challenge!
Fortify team spirit and topple individual barriers with The Domino Challenge! Experience a wonderful wave of emotions through self-and-team-discovery; from the initial brainstorming of strategies, perseverance during the process and understanding required when working as a team, right to the final execution to start a chain reaction!

Like each tile, each individual member plays a vital role in taking precise action and seeing the bigger picture. Each member is required to work collectively to piece each tile to create masterpieces that will literally make everyone hold their breath! Just bear in mind, every single action taken can trickle downwards and start a chain reaction - a Domino Effect!

The Domino Challenge! sparks interesting conversations about the domino effect that each member and each department can have on the organisation.

No boundaries, no limits! What can be imagined, can be created!

The Build-An-Empire Challenge! is based on the learning theory of Constructionism, which means that one learns through personal discovery of knowledge and its meaningfulness to themselves.

Through the challenge, participants will go through the process of self-discovery through expressing their thoughts, feelings and attitudes in creating products that they can identify with and are proud of. What you learn in the process of making things that you care about sinks much deeper into the subsoil of the brain.
The Robotics Challenge!

Teams will be tasked to navigate through all the parts together with minimal guidance and assemble them into a functioning robot. With the robot completed, they will go through a quick session to learn the different controls on the apps, their final objective will be to pit their robots against each other through a series of challenges, such as moving through a maze or picking items and moving them to a different location.

The possibilities are endless!

The Pixel Challenge aims to drive across a message for teams to realise that an organisation is not merely a sum of its parts, but one unit and one team, all in order to achieve success that exceeds expectations. A paradigm shift is necessary to pull individuals or groups away from the silo mentality or competitive mindset, and set their sights on the bigger picture and the common goal.

The setting of the challenge will mirror that of the real working environment, where resources may seem scarce until teams decide to share these resources. In doing so, they will soon realise that the picture that they have been assigned to paint is merely part of a bigger picture that the entire team has been tasked to complete.
Build Your Team The Gourmet Way!

In The Cooking Challenge, we tap on the interesting characteristics of a chef to bring across the importance of adopting the mindsets and skill sets of a high performance individual/team.

The Cooking Challenge tests teams' abilities to concoct the best recipe for success and it goes beyond the ability of just being a good chef. Teams will have to whip up a gastronomical feast using the Theory of Constructionism.

The Race Kart Challenge programme brings about our deepest desire for speed in a F1-like race. The Race Kart Challenge encourages participants to work within their teams to build a race kart according to the specifications provided. Teams will unleash their creativity to design and construct customised race kart from scratch with the given materials.
The Drone Challenge! It's the year 2057 and robots and drones have taken over most of the daily human jobs. Meanwhile, humans have levelled up their ability to operate complex systems. Your team represents a company that produces the latest public transportations. You have many competitors in the market who do the same thing, so speed and price is the key! Your objective is to be the fastest drone operator to complete tasks/bring passengers to their destination. Your team will consist of people who will cooperate to operate one drone. Each person will have a specific operation, for example, lovers the drone up and down; moving the drone sideways). The drones will be operated using a handheld device. Teams will need to communicate and coordinate well to fly the drone without crashing and accomplish all the tasks successfully.

STORM THE FRONT!
GO, GO, GO!

“COUNTERSTRIKE” AND “BATTLEFIELD 1942” ARE MORE REAL THAN EVER!
ENGAGE IN TACTICAL MISSIONS LIKE CAPTURE THE FLAG,
COUNTER TERRORIST BOMB DISPOSAL ETC...

An activity of Wit & Cunning, Stealth and Strategy. This adrenaline pumping and highly innovative, team-focused sport akin to engaging in a real-life combat simulation game, puts to test the team's ability to co-ordinate, strategise and execute an effective game plan while staying "alive" to accomplish a given mission.

Used to impart important values such as Leadership, Teamwork, Communication, Planning and Adaptation.

You will be running around, dodging your opponents ‘fire’ and shooting them down, as well as achieving objectives and missions as a team.
The Gold Mine Challenge! is a high-energy business simulation that works well with both senior managers as well as front-line employees. This challenge draws links to the importance of planning and decision making and has many relevant debriefing points. There is also a solid focus on collaboration and engagement. Teams need to find the lost gold mine of Jacob Waltz, the Deutchman, in the Superstition Mountains of Arizona.

The GREAT ESCAPE Challenge!

The space ship has been struck by a meteoroid and has malfunctioned! Participants are challenged to free themselves on the escape pod to get to safety before oxygen runs out. Puzzles, clues and riddles are hidden in the space ship, all waiting to be uncovered and solved. Do you have a good memory to remember the lock sequence? Do you have the flexibility to squeeze past the laser beams? Do you have the composure to solve the puzzles before time runs out?

Challenge yourself in The GREAT ESCAPE Challenge! where your brain is being pushed to the limits right till the very end. Utilize your team members’ strengths to tackle and overcome the various challenges!

Lead your team in beating the clock and survive!
Please feel free to contact our friendly Project Managers for further information. We will help you develop a unique learning programme for lasting results.
